Design Systems Engineer

Design Systems Engineer with 10+ years building production interfaces on national-scale consumer platforms. Built and owned Storybook-driven design systems adopted across multiple applications and teams at Songfinch and RE/MAX, with accessibility enforced structurally and visual regression guarding every component. Ships in both Vue and React, uses AI tooling as a default part of the build workflow, and brings a BFA in graphic design to partnership with product designers.

Professional Experience

Songfinch, Chicago, IL – Remote

March 2024 – Present

Senior Software Engineer

Songfinch connects fans with independent artists through personalized songs (400K+ delivered, \$35M+ paid to artists). Brought on to lead frontend architecture and platform unification, including building the design system that standardizes UI across all product surfaces.

- Built a Storybook-driven design system that unified 4 legacy styling paradigms across 5+ applications, cutting per-team UI integration time by 30% and standardizing component contracts across all front-end squads.
- Built and shipped the Vue 3 frontend for a TikTok-style video feed integrated into the core purchase funnel, powering 1.2M video views and doubling conversion from 3.5% to 7%+ over six months.
- Enforced accessibility standards across the Songfinch design system using eslint-plugin-jsx-a11y and Storybook's a11y addon, achieving and maintaining 100% Lighthouse accessibility scores across components.
- Generated 144 Storybook visual regression stories with Claude Code, using Chromatic to catch UI regressions amid rapidly evolving design requirements.
- Integrated AI coding workflows (Claude Code, Cursor, Copilot) into daily development across 3 apps and 6 packages, using shared prompt and config patterns to accelerate feature delivery roughly 3x and generate full Playwright E2E coverage for auth, builder, and purchase flows in a single day.
- Integrated Contentful into Songfinch's Vue design system, modeling 30 content types with auto-generated TypeScript types and wiring Ninetailed for personalization variants and A/B testing across 5 landing pages backed by 50+ components, running 3 concurrent experiments at peak.

RE/MAX, Denver, CO – Hybrid/Remote

November 2018 – January 2024

Senior Software Engineer

Brought on during acquisition-driven growth at an industry-leading real estate brand to help build a greenfield technology stack, with a primary focus on the consumer-facing app and a shared design system spanning multiple product applications.

- Led a frontend team of 15+ engineers in the development and adoption of a shared design system used across CRM, Customer, Leads, CMS, and Commercial applications, establishing reusable UI patterns and frontend standards adopted across multiple applications.

- Served as primary engineer on a production migration from Vue 3/Nuxt to React/Next.js 13/14, converting composables to hooks and Nuxt serverMiddleware to Next.js API routes across a consumer application serving 1.5M+ listings, while rebuilding the design-system component library in React.
- Optimized frontend performance across a 1.7M daily page view platform, cutting page load time from 2s to 0.5s and reducing bundle size by 80%, directly improving SEO rankings and user retention.
- Designed and maintained a scalable TypeScript monorepo with a shared design system and Next.js app, serving 7.6M+ monthly users.

Freelance, Chicago, IL – Remote

December 2015 – November 2018

Web Engineer

Served as an independent contractor, leading frontend architecture and product decisions for client applications across small, cross-functional teams.

- Built a reusable design system adopted across 3 concurrent client projects, cutting per-project UI implementation time by 50% and enforcing consistent component standards.

Earlier Experience

Designer, Real Estate Publication, Agent Publishing, Chicago IL

Education

Bachelor of Fine Arts, BFA, Graphic Design, American Academy of Art, Chicago, IL

Skills

Design Systems & Accessibility: Design Systems | Storybook | Chromatic | Figma | eslint-plugin-jsx-a11y | Lighthouse | Web Accessibility (a11y)

Frontend: Vue (2/3) | React | TypeScript | Next.js | Nuxt | React Server Components | SASS/SCSS | Tailwind

Testing & Quality: Vitest | Jest | React Testing Library | Playwright | Cypress

Tooling & Platform: AI-Assisted Development (Claude Code, Copilot, Cursor) | Vite | Webpack | TurboRepo | Node.js
