Senior Frontend Engineer

Senior Frontend Engineer with 10+ years building large-scale, design-system-driven web applications in both Vue and React/Next.js, including production framework migrations in both directions. Cut page load time from 2s to 0.5s and bundle size by 80% on a consumer platform serving 1.7M daily page views, and shipped Storybook-driven design systems that unified fragmented styling paradigms across multiple applications. AI-native workflow with Claude Code, Cursor, and Copilot, accelerating delivery roughly 3x while maintaining 90%+ test coverage on critical packages.

Professional Experience

Songfinch, Chicago, IL – Remote

March 2024 – Present

Senior Software Engineer

Songfinch connects fans with independent artists through personalized songs (400K+ delivered, \$35M+ paid to artists). Brought on to unify fragmented frontend systems and tech stacks to enable scalable development and consistent product experiences.

- Built and shipped the Vue 3 frontend for a TikTok-style video feed integrated into the core purchase funnel, powering 1.2M video views and doubling conversion from 3.5% to 7%+ over six months.
- Consolidated 8 projects into 4 and unified three frontend tech stacks into a single Vue 3 + TypeScript architecture, including migrating legacy Vue 2 codebases, reducing legacy code and maintenance overhead by over 50%.
- Built a Storybook-driven design system that unified 4 legacy styling paradigms across 5+ applications, cutting per-team UI integration time by 30% and standardizing component contracts across all front-end squads.
- Rebuilt Song Builder to expand add-on sales pathways, lifting average order value by 66%.
- Integrated AI coding workflows (Claude Code, Cursor, Copilot) into daily development across 3 apps and 6 packages, using shared prompt and config patterns to accelerate feature delivery roughly 3x and generate full Playwright E2E coverage for auth, builder, and purchase flows in a single day.
- Established unit testing in the frontend codebase, achieving 90% coverage of utilities and data source packages with Vitest, enhancing code quality and confidence in iterative releases.

RE/MAX, Denver, CO – Hybrid/Remote

November 2018 – January 2024

Senior Software Engineer

Brought on during acquisition-driven growth at an industry-leading real estate brand to help build a greenfield consumer-facing app for mapped listings and agent profile pages on a new technology stack.

- Optimized frontend performance across a 1.7M daily page view platform, cutting page load time from 2s to 0.5s and reducing bundle size by 80%, directly improving SEO rankings and user retention.
- Served as primary engineer on a production migration from Vue 3/Nuxt to React/Next.js 13/14, converting composables to hooks and Nuxt serverMiddleware to Next.js API routes across a consumer application serving 1.5M+ listings, while rebuilding the design-system component library in React.

- Designed and implemented a GraphQL BFF aggregating data from Elasticsearch and multiple backend services, shrinking average API payload size from ~1MB to ~50KB and eliminating over-fetching across the consumer application.
- Built server-side middleware and dynamic routing within a Next.js/Nuxt architecture to generate 1,000+ custom agent subdomains on demand, enabling white-label agent profile experiences without per-site deploys.

Freelance, Chicago, IL – Remote

December 2015 – November 2018

Web Engineer

Independent contractor leading frontend architecture and product decisions for client applications across small, cross-functional teams.

- Delivered 20+ web and mobile applications for international clients across e-commerce, media, and real estate verticals, leading product strategy, UX design, and full-stack engineering from concept through launch.

Earlier Experience

Designer, Real Estate Publication, Agent Publishing, Chicago IL

Education

Bachelor of Fine Arts, BFA, Graphic Design, American Academy of Art, Chicago, IL

Skills

Technical Skills: Design Systems | Application Architecture | Web Accessibility (A11y) | Server-Side Rendering (SSR) | Static Site Generation (SSG) | AI-Assisted Development (Claude Code, Copilot, Cursor) | Unit Testing | Visual Regression Testing | Monorepos | CI/CD | AWS Services | Internationalization (i18n)

Languages & Frameworks & Tools: Vue (2/3) | TypeScript | React | Next.js | Nuxt | JavaScript (ES6) | Vuex/Pinia | Redux | Node.js | GraphQL | Apollo | Nest.js | Rails | Tailwind | SASS/SCSS | Storybook | Chromatic | Vitest | Jest | Playwright | Cypress | React Testing Library | Vite | Webpack | TurboRepo | Docker | Kubernetes | PostgreSQL | Figma | Sentry | Datadog | Lighthouse | Git
